

RIGHTEOUS BLOOD, RUTHLESS BLADES

NAME GENERATION TABLES

Created by Jeremy Bai, Xue Yuanyuan, and Paul Song

HOW TO USE THESE TABLES

Creating an authentic Chinese name can be difficult, especially when devising names for Chinese fantasy settings such as wuxia. This guide is intended to make it easy for players and GMs alike to quickly create authentic and meaningful names for the game *Righteous Blood, Ruthless Blades*.

Chinese names generally follow the pattern: (Surname) (Given Name) or in more conversational terms (Last Name)(First Name). For more information, please see the section Names, Titles, and Nicknames in chapter 10 of *Righteous Blood, Ruthless Blades*.

The tables in this guide may be used with dice to randomly generate a name, or you can browse through the names to find something that works best for you. To make your name, start with a surname, either selecting one you like or rolling randomly. Then add a given name in the same manner. The result should be a name between two to four characters long, separated into two “words” as in: Zhu Meng (朱猛), Gao Jianfei (高渐飞), or Sima Chaochun (司马超群). The tables for Religious names function slightly differently, with specific instructions included in those sections.

We have exercised care to ensure that as many combinations work as possible, but nothing is perfect. It is possible to pick combinations of characters that might sound strange or even “wrong” to someone who speaks Chinese. If you have the option, you can ask a native speaker of Chinese for their opinion on any names you generate. If you have no friends who speak Chinese, you might be able to find help online. In some cases, there are surname/given name table combinations that will inherently clash. For instance, it might not be a good idea to combine a “Dark” surname with a “Righteous” given name.

If a name seems hard to pronounce, you can simply copy the Chinese characters into a text-to-speech tool to hear the name spoken aloud (Google Translate is a simple and free option in this regard).

In spoken Chinese, it's not always obvious which characters make up a name, so sometimes Chinese speakers will explain the characters in their name when introducing themselves or when meeting someone for the first time, especially with unusual or rare names. Incorporating a similar custom in your roleplaying would be perfectly acceptable and realistic in terms of Chinese culture.

There are many complex rules and taboos associated with names, and also complicated customs regarding how to choose them. It was also historically common for people to have more than one name. However, this guide does not touch on those aspects, and is intended primarily as quick and simple aid for basic name generation. If you are interested in delving into deeper levels of the cultural and historical aspects of naming, we encourage you to do outside research, and if possible, consult a Chinese-speaking expert on the subject.

The names have been provided in both Traditional and Simplified characters, as well as the Romanized version using pinyin. Because this guide is not intended to be used for language-learning purposes, the Romanized versions do not include the diacritics for the tones.

We have included simple definitions for the Chinese characters, but keep in mind these definitions are not intended to be exhaustive. In many cases, a single Chinese character can have numerous possible meanings, while we only provide two or three of the most common and relevant.

SURNAMES

A surname is a name which unites all members of a given family or clan. Although most Chinese characters have specific meanings, when used as parts of names, they are generally understood to be just that: names.

COMMON

This list contains some of the most common surnames. Throughout history, commoners and famous people alike have born these names, which in some way makes them anonymous, similar to common English surnames such as Smith or Jones.

This list is based on the commonness of Chinese surnames in modern times. Throughout history, the prevalence of specific surnames has waxed and waned. Furthermore, some names are associate with specific geographic regions. For example, in modern times, the surname Li is more common in North and Southwest China, and less common in South and Southeast China. If you are concerned with historical and cultural accuracy, you can do further research to get information on the specific surnames. One simple way to do this is by an internet search such as “Wang Chinese surname”.

There is no need to limit yourself to only these names. Do some research into the “top 100 Chinese surnames” and you will find many, many more surnames to pick from. And there are many more than 100 most common versions, if you delve a bit deeper into the subject.

| COMMON SURNAMES | | | | |
|-----------------|---|---|---------|--|
| d20 | 繁 | 简 | English | Meaning |

| 8 | 殷 | 殷 | Yin | Flourishing |
| 9 | 楚 | 楚 | Chu | Surname |
| 10 | 牟 | 牟 | Mi | Surname |

COMPOUND

In ancient times it was more common to see surnames with two characters. Many were associated with specific regions or groups. These are some of the most common of those ancient compound surnames. If historical accuracy is important to you, you might want to do some research into the specific compound name you plan to use, as it could be relevant to your character's backstory.

| 9 | 雙 | 双 | Shuang | Double, twofold, twin |
| 10 | 機 | 机 | Ji | Machine, opportunity, quick-witted |

PROFOUND

These are surnames which either sound inherently mysterious and profound, or are related to profound aspects of Chinese culture, philosophy, and religion. Many of these characters appear in common words, but at the same time, can be combined with other characters to form deep and complex concepts. Most are difficult to fully describe in only a few words, so the definitions provided are basic simplifications. If you want to have a deeper understanding of the meaning of these characters, we recommend doing further research into the specific character you pick.

GIVEN NAMES

With thousands of Chinese characters to pick from and combine, the possibilities for given names in Chinese are virtually endless.

Most names in the tables consist of two characters. However, many of those character combinations can be split. In other words, the combination Wang Meili 王美丽 could be split into Wang Mei 王美 or Wang Li 王丽. Characters that are suitable for standalone use are listed separately in the “English” column of each table. If you choose to use only one character from a given entry, bear in mind that it may remove the thematic implication. For example, one of the names in the Beautiful table is Changqing (长卿), which is an archaic word for butterfly. You could split the name up and use either of the characters on their own, but in that case, the “beautiful” aspect is lost, as Chang simply means “long”, while Qing means “high-ranking official, dignitary”. Put simply, using the single characters might not be best if you are aiming to create a meaningful name. That said, one-character given names are common in Chinese culture, so don't shy away from using them. Not every name needs to be packed with layers of meaning.

Some character combinations make specific words that surpass the individual definitions of the characters (as in the example of Changqing above). In those instances, the definition for the combined word is listed first, followed by the individual definitions. Even in cases where individual characters aren't suitable for use as given names, their definitions are included for reference purposes.

Remember that, in the end, these are just names. Although the Chinese characters do have meaning, they are primarily used to identify a person. While Chinese speakers might explain the meaning of the characters in their name if they aren't obvious, or perhaps make puns based on the characters, they don't necessarily think of the definitions when using the names. In that regard, they are similar to common English words that are also used as first names, such as Pepper, Chase, Skip, Pierce, Hunter, or Kitty. When used as names, those words become associated primarily with the person, not the original definition of the word.

Many Chinese characters and words are specifically masculine or feminine, whether by definition or implication. In other cases, they are not. For this reason, we identify names with the following tags: M for masculine, G for gender-neutral, and F for feminine. We also have three complete tables specifically for those three types of names.

Some names are repeated in multiple tables, and there is even more repetition in terms of individual Chinese characters.

This guide is primarily for use in creating unique and important characters, in other words, player characters or perhaps key NPCs. Gamemasters who plan to create large numbers of NPCs whose names aren't particularly important might be better served finding another resource. For instance, if the GM is created a constabulary with dozens of constable NPCs, the Constable table below will not suffice. There are name-generation tools that can be found online which are perfect for such scenarios.

THEMATIC NAMES

COMMON

These are everyday names for just about any situation. Some sound more impressive than others, but they all come across as ordinary names that anyone could bear. Because of the vast number of combinations possible with names, these are by no means intended to represent the “most” common names.

RELIGIOUS NAMES

In real life, the methods of selecting (or being given) a religious name are generally complicated and relate to profound aspects of the religion itself. If you are interested in maintaining a high level of accuracy on a historical or cultural level, we encourage you to do your own research.

Our suggestions here, while informed by real-life customs, are designed to replicate wuxia movies and novels. They are focused on entertainment value rather than realism, and are not intended to be accurate representations of real-life naming practices.

Even if your character has a religious name, they would most likely have a traditional surname and given name that they have renounced or abandoned. If you anticipate that playing into your backstory (for instance if you were once a famous bandit or a notorious criminal, or have family members who might play into your campaign), you might wish to create your “former” name as well and give it to the GM.

BUDDHIST MONK/NUN

Buddhist monks and nuns will usually have a Dharma name that relates to profound Buddhist teachings. If your character is a low-level apprentice or disciple, your Dharma name would be bestowed by superiors in your order, and would reflect how they hope to see you change or transform as part of your religious journey. If your character is a “master” or higher-ranking member of the order, you might have selected your own Dharma name to reflect your spiritual enlightenment or perceived future path.

In order to emulate the movies and novels *Righteous Blood*, *Ruthless Blades* is based on, we have devised a simplified and fictional approach to creating a Dharma name. First, establish a short passage of text that epitomizes the ideals of your character. This could be a quote from a sutra or words spoken to your character by a wiser member of your order. Feel free to take inspiration from real-life Buddhist teachings, or simply create something that seems appropriate. Next, take one or two words from that passage to be your Dharma name. For inspiration, see below. The examples provided are not translated from Chinese, but rather, are contrived for purposes of this guide, so we are not including Chinese. And again, this approach is entirely fictional and is not based on real-life custom.

Note that the Dharma name could stack with other titles that may exist in a Buddhist order, such as Abbot, Instructor, Groundskeeper, Archivist, etc.

| DHARMA NAMES | | | |
|--------------|--|--------|------------------|
| d10 | Phrase | Gender | Dharma name |
| 1 | Strive for generosity | M | Generosity |
| 2 | Achieve true clarity of thought | M | True Clarity |
| 3 | Seek the stillness of a deep pool of water | M | Deep Pool |
| 4 | Acquire the wonderful wisdom of the past | G | Wonderful Wisdom |
| 5 | Develop a great mind | G | Great Mind |
| 6 | Understand how to be a loyal friend | G | Loyal Friend |
| 7 | Enter a state of true void | G | True Void |
| 8 | Become like a drifting peony | F | Peony |
| 9 | Grow a heart like a jewel | F | Jewel Heart |
| 10 | Carry yourself like a serene garden | F | Serene Garden |

DAOIST PRIEST/NUN

Daoist names are generally more flexible than Dharma names. Most consist of a title paired with either A) a surname, or B) a carefully-selected nickname that harkens to Daoist teachings or represents personal ideals, ambitions, enlightenment, etc.

If your character is a low-level disciple or apprentice, simply pair your character's birth surname with the title "Daoist". In other words, if your name is Wang Guoqing, you can call yourself Daoist Wang. This applies to all genders.

If your character is a "master" or higher-ranking member of the order, you can still use "Daoist," or you can use the tables below to select a new title. Then, use the next table to select a nickname to pair with the title. If you wish, you can forego the title and simply use a nickname. Obviously, you can feel free to use your imagination and come up with a nickname other than one from the table. Note that in Chinese, titles come after names, unlike English in which a title usually comes before a name. So while the Chinese title 纯阳真人 would be directly translated "Pure Yang Reverend", experienced translators would usually translated it as Reverend Pure Yang.
